xix. False
xx. True

Answer to the question no. 2

i. Income expenditure
ii. willingness to pay
iii. overall price level
iv. monetary
v. imputed

Answer to the question no. 3

i. Because GDP measures production over time, not at a point.
ii. Same activity, but only market transactions count in GDP.
iii. They do not represent production.
iv. Nominal uses current prices; real uses base-year prices.
v. Real GDP reflects real production change, not price changes.
